Logs

The screenshot displays an n8n workflow editor for a job hunting automation. The workflow begins with a 'Schedule Trigger' node, followed by a 'Download file' node, then an 'Extract from File' node. It then proceeds to 'Get row(s) in sheet', 'Create searchurl', and 'Fetch Jobs from Indeed'. The data is then processed by an 'HTML' node, which splits into two paths. One path goes through 'Split Out' and 'Limit' nodes. The other path goes through 'Wait', 'HTTP Request', 'HTML', and 'Edit Fields' nodes. Both paths then merge and feed into an 'AI Agent' node, which is connected to a 'Google Gemini Chat Model'. The AI Agent's output is processed by 'Send a message' and 'Send a text message' nodes. The workflow then loops back to the 'AI Agent' node via a 'Loop Over Items' node. The interface includes a top navigation bar with various tabs, a left sidebar with tool icons, and a right sidebar with a search bar and other controls. The workflow is titled 'Job Hunt n8n' and has a status of 'Published'.
